2Q26 Earnings Preview: Potential upside to OI and AWS revenue

For AMZN's 2Q26 earnings, we anticipate results near the high end of management's revenue guidance and above consensus, supported by a combination of resilient e-commerce trends, accelerating AWS growth, and continued strength in advertising. Importantly, our checks suggest AWS demand remains a meaningful source of upside. We forecast AWS revenue growth of 33% y/y in 2Q26, accelerating from 28% in 1Q26, with further acceleration to 34% in 3Q26. Our estimates are approximately 1-2% ahead of consensus in both quarters, though we believe buy-side expectations are closer to 35-36% AWS growth in 2Q. Recent indicators around new commitments, consumption growth, inference demand, and AI capacity deployments suggest AWS momentum continues to build.

Across the broader business, e-commerce trends improved through the quarter and accelerated meaningfully around Prime Day. Given Prime Day occurred in 2Q this year versus 3Q last year, we believe the Street has underappreciated the timing benefit to 2Q results and the corresponding demand pull-forward impact on 3Q. We forecast online store revenue growth of 15% in 2Q and 5% in 3Q, above consensus for 2Q and below consensus for 3Q. While the quarter's Prime Day benefit is widely recognized, we believe the magnitude of the resulting 3Q headwind remains underappreciated. At the same time, our advertising checks remain constructive, indicating growth is being supported by both retail media and performance CTV, while Amazon continues to gain share through its closed-loop advertising ecosystem and the growing adoption of Amazon DSP.

We expect reported results to land near the high end of management's revenue guidance and approximately 1% above consensus, while operating income has the potential to be a more meaningful source of upside. Our current forecast is 2-3% above the high end of management's operating income outlook and roughly 2% above Street estimates, though given the strength of AWS and advertising trends we believe the setup supports the potential for a mid-single-digit operating income beat. Beyond the quarter, capex remains one of the most important investor debates. While AMZN's current guide for 2026 capex is ~\$200bn, investors increasingly appear focused on whether management may raise that outlook following Alphabet's increased capex. Looking ahead to 2027, buy-side expectations have moved toward the low \$300bn range versus consensus near \$235bn. We have raised our own 2027 capex estimate to

~\$300bn and remain open to the possibility that FY26 spending ultimately lands modestly above the current \$200bn framework.

All in all, we modestly lower our 2026 EPS by 0.5% and raise our 2027 estimate by ~2%. Additionally, we reiterate our Buy rating and our target price remains at \$315. Our TP is derived by a blended approach that uses both a SOTP model and a 30x GAAP EPS multiple on 2027 estimates. For our SOTP model, we comp the Amazon Retail business to large retailers and AWS business against large software and cloud providers. We believe AWS is a clear winner in the generative AI computing paradigm shift and the multiple should reflect this.

2Q e-commerce trends improve due to Prime Day; 3Q could have some downside risk

Data from Second Measure along with Sensor Tower DAU growth imply improving trends for Amazon from its guidance date through the end of the quarter. Second Measure US sales growth held relatively stable until accelerating on Amazon Prime Day (6/23-6/26). Worldwide Amazon app DAU y/y growth steadily accelerated after early May then took another step up after Prime Day. As a reminder, last year's Prime Day was in 3Q (7/8-7/11/25) as opposed to 2Q this year. The company quantified the Prime Day shift in 2021 and 2022 between 2Q and 3Q at 4 percentage points for the two-day sale, while this year's Prime Day sale ran for 4 days. We expect at least a 4 point benefit to 2Q26 with a larger negative impact to 3Q given pull-forward demand impacts. As such, we model Online Sales growth of 15%/5% for 2Q/3Q, 1.6% ahead/1.0% lower than consensus on intra-quarter engagement data improvement leading up to Prime Day and underappreciation of Prime Day timing impact.

Figure 1: Second Measure US Sales Data

Figure 2: Sensor Tower Daily Average User (DAU) y/y Growth

Worldwide: DAU y/y % change

Our advertising checks indicate growth in the quarter was driven by both retail media and performance CTV. Sponsored Products and Sponsored Search continued to grow rapidly, particularly heading into key shopping periods. There has also been strong advertiser demand for Amazon's closed-loop measurement capabilities, which combine brand advertising with transaction-based performance measurement. Advertisers are increasingly leveraging both retail media and premium video inventory within Amazon's ecosystem, contributing to share gains. In addition, feedback suggests Amazon DSP remains highly competitive from a technology-cost perspective, with lower platform fees supporting stronger ROI and helping Amazon take share from both general-purpose and pharma-focused DSPs. Overall, we adjust our advertising revenue forecast higher by ~1% in 2Q and 3Q.

On AWS, checks with Aran Khanna of Archera ([link](#)) suggested NTM committed dollar growth accelerated from just over 30.5% in March to slightly above 35% in June while consumption growth stepped up from 35.5% to just under 38% over the same period. Mr. Khanna cited AWS as continuing to bring inference capacity online in a steady stair-step fashion, mostly for inference-related capacity to deliver against its backlog. They still appear to have ample Sonnet capacity on Trainium via Bedrock, while higher-end Opus and Fable are still much more constrained in Bedrock. AWS has also reportedly tightened pricing and commitment terms, requiring 1-year commits from smaller customers to even get A100 capacity and raising prices for certain H200 configurations running on NVDA's networking architecture. Separately, AWS was cited as winning a greater share of VMware migration workloads as access to newer Intel CPU capacity positioned it relatively well in a capacity-constrained environment. Lastly, the availability of both Claude and GPT models was highlighted as helping AWS capture incremental AI volume from customers whose broader production environments were already running on the platform. **For 2Q26, we forecast AWS revenue growth y/y of 33%, an acceleration from 1Q at 28%, with continued acceleration into 3Q at 34% and through the end of the year. We are 1%/2% ahead of consensus for 2Q/3Q, but believe the Buyside bogey is higher at 35-36% growth. We expect recent AWS y/y margin compression to have bottomed in 1Q at 37.7% (vs. 39.5% in 1Q25) then modestly improve y/y to 33.7% in 2Q26 (vs. 32.9% in 2Q25) and 34.7% in 3Q (vs. 34.6% in 3Q25).**

We estimate a narrower spread between AWS and GCP incremental revenue market share:

Figure 3: Incremental Revenue Market Share

Of course, Capex remains a key debate. **Prior to Alphabet recently raising FY26 capex guide, we think there were limited expectations for Amazon to increase its current 2026 guidance of \$200bn. However, now, it is likely investors fear an increase in FY26 outlook may be coming, although we would point out that Alphabet's raised capex guide includes the impact of both incremental capacity adds as well as price increases.** As our base case, we do not think Amazon may be adding more capacity beyond what's currently planned, though we are open to the idea that it could be marginally higher for 2026. Looking further ahead, buyside expectations for 2027 capex are north of \$300bn vs. consensus at only \$235bn. We are raising our estimate to ~\$300bn in 2027. The headline investment is significant, although the directly funded amount could be lower after accounting for partner-funded capacity such as Anthropic's long-term committed capacity agreements and a growing contribution from lower-cost internal silicon.

Historical Performance and Our Estimates vs. Guidance

AMZN has typically come in at the high end of Revenue guidance or beaten by low single digits, while beating the high end of guidance for Operating Income by low- to high-single digits (11% in 1Q26). Given the strength of our checks around AWS, Ads, and Retail, we forecast Revenue ~1% above the high end of guidance, which is also ~1% above consensus. For Operating Income we are 2-3% above the high end of guidance and ~2% above Street.

Figure 4: Historical Performance vs. Guidance

Funding to support capex plans

AMZN has accessed multiple funding channels in 2026 as it executes against its ~\$200bn FY26 capex plan. Prior to the start of 2Q, the company raised approximately \$54bn through US-dollar and euro-denominated bond offerings, including a \$37bn US transaction and a €14.5bn euro offering. During 2Q26, AMZN completed an inaugural CHF2.82bn, or approximately \$3.6bn, Swiss-franc bond offering across six tranches and a C\$14bn, or approximately \$10.0bn, Canadian-dollar offering across five tranches. The Canadian transaction represented the largest corporate bond issuance in the history of that market. AMZN also entered into a \$17.5bn senior unsecured delayed-draw term-loan facility that can be accessed through September 30, 2026 and provides additional liquidity flexibility. Following quarter-end, AMZN further strengthened its funding position through an approximately \$25bn US-dollar bond issuance across eight tranches with maturities extending out to 40 years.

In aggregate, we estimate AMZN has raised approximately \$92bn-\$93bn of completed debt financing during 2026, consisting of roughly \$54bn raised in March, \$13.6bn raised through the Swiss-franc and Canadian-dollar offerings in 2Q, and approximately \$25bn from the July bond issuance. In addition, the company has access to a further \$17.5bn of committed borrowing capacity through its delayed-draw facility. At 1Q26-end, AMZN held \$86.8bn of cash and cash equivalents and \$36.2bn of marketable securities, which together with ongoing operating cash generation should provide substantial liquidity to support its elevated AI infrastructure investment cycle.

Risks

To the extent there is a slowdown in the broader economy that would pressure e-commerce demand and/or ongoing supply constraints remain in place for Amazon's cloud business, we could see downside risk to our estimates.

Appendix 1

Important Disclosures

Company	Ticker	Recent price	Disclosure
Amazon	AMZN.OQ	232.11 (USD) 24 Jul 26	1, 7, 8, 14, 15, 21, 24, 26

Prices are current as of the end of the previous trading session unless otherwise indicated and are sourced from local exchanges via Reuters, Bloomberg and other vendors. Other information is sourced from Deutsche Bank, subject companies, and other sources.

Important Disclosures Required by U.S. Regulators

1 - Within the past year, Deutsche Bank and/or its affiliate(s) has managed or co-managed a public offering for this company, for which it received fees.

7 - Deutsche Bank and/or its affiliate(s) has received compensation from this company for the provision of investment banking or financial advisory services within the past year.

8 - Deutsche Bank and/or its affiliate(s) expects to receive, or intends to seek, compensation for investment banking services from this company in the next three months.

14 - Deutsche Bank and/or its affiliate(s) has received compensation from this company within the past year for non-investment banking related services.

15 - This company has been a client of Deutsche Bank Securities Inc. within the past year during which time it received investment banking services.

21 - This company has been a client of Deutsche Bank Securities Inc. within the past year, during which time it received non-investment banking securities-related services.

Important Disclosures Required by Non-U.S. Regulators

1 - Within the past year, Deutsche Bank and/or its affiliate(s) has managed or co-managed a public offering for this company, for which it received fees.

24 - Deutsche Bank and/or its affiliate(s) is or has been over the previous 12 months party to an agreement with the company relating to the provision of services set out in Sections A and B of Annex I of Directive 2014/65/EU, or has over the previous 12 months been obliged or entitled (as applicable) to pay or receive compensation relating to the provision of services set out in Sections A and B of Annex I of Directive 2014/65/EU.

26 - Within the preceding 12 months, Deutsche Bank and/or its affiliate(s) has received compensation for the provision of investment banking services or is currently providing or has provided investment banking services to this company.

Company rating dispersion and banking relationships

DBSI Companies under Coverage	Buy	Hold	Sell
Covered	58%	42%	0%
w/ Banking relationship	42%	36%	0%
w/ MiFID services	63%	52%	67%

Global Companies under Coverage	Buy	Hold	Sell
Covered	58%	40%	2%
w/ Banking relationship	46%	32%	32%
w/ MiFID services	75%	69%	94%

Company Rating and Dispersion Key

The above table provides a snapshot of Deutsche Bank's company research rating distribution across our covered companies. We also present the percentage of companies where Deutsche Bank has provided Investment Banking Services in the past 12 months and/or MIFID Investment and Ancillary services, in the past 12 months. Please see the key and definition of our rating below.

Note - percentages are rounded so may not total 100%.

Covered: The overall rating distribution across all companies under coverage with a rating.

w/Banking relation: Percentage of companies under coverage with a rating within each of the "buy", "hold" and "sell" categories for which Deutsche Bank has provided Investment Banking Services within the previous 12 months.

w/MiFID services: Percentage of companies under coverage with a rating within each of the "buy", "hold" and "sell" categories for which Deutsche Bank has provided MIFID Investment and Ancillary services within the previous 12 months.

Buy/Hold/Sell Percentages: These percentages reflect the proportion of companies within each category that have been assigned the corresponding rating, based on our 12-month view of Total Shareholder Return (TSR).

Rating definitions:

Buy: Based on a current 12-month view of TSR, we recommend that investors buy the stock.

Sell: Based on a current 12-month view of TSR, we recommend that investors sell the stock.

Hold: We take a neutral view on the stock 12-months out and, based on this time horizon, do not recommend either a Buy or Sell.

TSR: Total Shareholder Return. Percentage change in share price from current price to projected target price plus projected dividend yield.

Newly issued research recommendations and target prices supersede previously published research.

Additional Information

The information and opinions in this report were prepared by Deutsche Bank AG or one of its affiliates (collectively 'Deutsche Bank'). Though the information herein is believed to be reliable and has been obtained from public sources believed to be reliable, Deutsche Bank makes no representation as to its accuracy or completeness. Hyperlinks to third-party websites in this report are provided for reader convenience only. Deutsche Bank neither endorses the content nor is responsible for the accuracy or security controls of those websites.

If you use the services of Deutsche Bank in connection with a purchase or sale of a security that is discussed in this report, or is included or discussed in another communication (oral or written) from a Deutsche Bank analyst, Deutsche Bank may act as principal for its own account or as agent for another person.

Deutsche Bank may consider this report in deciding to trade as principal. It may also engage in transactions, for its own account or with customers, in a manner inconsistent with the views taken in this research report. Others within Deutsche Bank, including strategists, sales staff and other analysts, may take views that are inconsistent with those taken in this research report. Deutsche Bank issues a variety of research products, including fundamental analysis, equity-linked analysis, quantitative analysis and trade ideas. Recommendations contained in one type of communication may differ from recommendations contained in others, whether as a result of differing time horizons, methodologies, perspectives or otherwise. Deutsche Bank and/or its affiliates may also be holding debt or equity securities of the issuers it writes on. Analysts are paid in part based on the profitability of Deutsche Bank AG and its affiliates, which includes investment banking, trading and principal trading revenues.

Opinions, estimates and projections constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Deutsche Bank and are subject to change without notice. Deutsche Bank provides liquidity for buyers and sellers of securities issued by the companies it covers. Deutsche Bank research analysts sometimes have shorter-term trade ideas that may be inconsistent with Deutsche Bank's existing longer-term ratings. Some trade ideas for equities are listed as Catalyst Calls on the Research Website (<https://research.db.com/Research/>), and can be found on the general coverage list and also on the covered company's page. A Catalyst Call represents a high-conviction belief by an analyst that a stock will outperform or underperform the market and/or a specified sector over a time frame of no less than two weeks and no more than three months. In addition to Catalyst Calls, analysts may occasionally discuss with our clients, and with Deutsche Bank salespersons and traders, trading strategies or ideas that reference catalysts or events that may have a near-term or medium-term impact on the market price of the securities discussed in this report, which impact may be directionally counter to the analysts' current 12-month view of total return or investment return as described herein. Deutsche Bank has no obligation to update, modify or amend this report or to otherwise notify a recipient thereof if an opinion, forecast or estimate changes or becomes inaccurate. Coverage and the frequency of changes in market conditions and in both general and company-specific economic prospects make it difficult to update research at defined intervals. Updates are at the sole discretion of the coverage analyst or of the Research Department Management, and the majority of reports are published at irregular intervals. This report is provided for informational purposes only and does not take into account the particular investment objectives, financial situations, or needs of individual clients. It is not an offer or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Target prices are inherently imprecise and a product of the analyst's judgment. The financial instruments discussed in this report may not be suitable for all investors, and investors must make their own informed investment decisions. Prices and availability of financial instruments are subject to change without notice, and investment transactions can lead to losses as a result of price fluctuations and other factors. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the investment. Past performance is not necessarily indicative of future results. Performance calculations exclude transaction costs, unless otherwise indicated. Unless otherwise indicated, prices are current as of the end of the previous trading session and are sourced from local exchanges via Reuters, Bloomberg and other vendors. Data is also sourced from Deutsche Bank, subject companies, and other parties. Artificial intelligence tools may be used in the preparation of this material, including but not limited to assist in fact-finding, data analysis, pattern recognition, content drafting and editorial corrections pertaining to research material.

The Deutsche Bank Research Department is independent of other business divisions of the Bank. Details regarding our organizational arrangements and information barriers we have to prevent and avoid conflicts of interest with respect to our research are available on our website (<https://research.db.com/Research/>) under Disclaimer.

Macroeconomic fluctuations often account for most of the risks associated with exposures to instruments that promise to pay fixed or variable interest rates. For an investor who is long fixed-rate instruments (thus receiving these cash flows), increases in interest rates naturally lift the discount factors applied to the expected cash flows and thus cause a loss. The longer the maturity of a certain cash flow and the higher the move in the discount factor, the higher will be the loss. Upside surprises in inflation, fiscal funding needs, and FX depreciation rates are among the most common adverse macroeconomic shocks to receivers. But counterparty exposure, issuer creditworthiness, client segmentation, regulation (including changes in assets holding limits for different types of investors), changes in tax policies, currency convertibility (which may constrain currency conversion, repatriation of profits and/or liquidation of positions), and settlement issues related to local clearing houses are also important risk factors. The sensitivity of fixed-income instruments to macroeconomic shocks may be mitigated by indexing the contracted cash flows to inflation, to FX depreciation, or to specified interest rates - these are common in emerging markets. The index fixings may - by construction - lag or mis-measure the actual move in the underlying variables they are intended to track. The choice of the proper fixing (or metric) is particularly important in swaps markets, where floating coupon rates (i.e., coupons indexed to a typically short-dated interest rate reference index) are exchanged for fixed coupons. Funding in a currency that differs from the currency in which coupons are denominated carries FX risk. Options on swaps (swaptions) the risks typical to options in addition to the risks related to rates movements.

Derivative transactions involve numerous risks including market, counterparty default and illiquidity risk. The appropriateness of these products for use by investors depends on the investors' own circumstances, including their tax position, their regulatory environment and the nature of their other assets and liabilities; as such, investors should take expert legal and financial advice before entering into any transaction similar to or inspired by the contents of this publication. The risk of loss in futures trading and options, foreign or domestic, can be substantial. As a result of the high degree of leverage obtainable in futures and options trading, losses may be incurred that are greater than the amount of funds initially deposited - up to theoretically unlimited losses. Trading in options involves risk and is not suitable for all investors. Prior to buying or selling an option, investors must review the 'Characteristics and Risks of Standardized Options', at <https://www.theocc.com/company-information/documents-and-archives/options-disclosure-document>. If you are unable to access the website, please contact your Deutsche Bank representative for a copy of this important document.

Participants in foreign exchange transactions may incur risks arising from several factors, including the following: (i) exchange rates can be volatile and are subject to large fluctuations; (ii) the value of currencies may be affected by numerous market factors, including world and national economic, political and regulatory events, events in equity and debt markets and changes in interest rates; and (iii) currencies may be subject to devaluation or government-imposed exchange controls, which could affect the value of the currency. Investors in securities such as ADRs, whose values are affected by the currency of an underlying security, effectively assume currency risk.

Unless governing law provides otherwise, all transactions should be executed through the Deutsche Bank entity in the investor's home jurisdiction. Aside from within this report, important conflict disclosures can also be found at <https://research.db.com/Research/> on each company's research page or under the 'Disclosures' tab. Investors are strongly encouraged to review this information before investing.

Deutsche Bank (which includes Deutsche Bank AG, its branches and affiliated companies) is not acting as a financial adviser, consultant or fiduciary to you or any of your agents (collectively, "You" or "Your") with respect to any information provided in this report. Deutsche Bank does not provide investment, legal, tax or accounting advice, Deutsche Bank is not acting as your impartial adviser, and does not express any opinion or recommendation whatsoever as to any strategies, products or any other information presented in the materials. Information contained herein is being provided solely on the basis that the recipient will make an independent assessment of the merits of any investment decision, and it does not constitute a recommendation of, or express an opinion on, any product or service or any trading strategy.

The information presented is general in nature and is not directed to retirement accounts or any specific person or account type, and is therefore provided to You on the express basis that it is not advice, and You may not rely upon it in making Your decision. The information we provide is being directed only to persons we believe to be financially sophisticated, who are capable of evaluating investment risks independently, both in general and with regard to particular transactions and investment strategies, and who understand that Deutsche Bank has financial interests in the offering of its products and services. If this is not the case, or if You are an IRA or other retail investor receiving this directly from us, we ask that you inform us immediately.

In July 2018, Deutsche Bank revised its rating system for short term ideas whereby the branding has been changed to Catalyst Calls ("CC") from SOLAR ideas; the rating categories for Catalyst Calls originated in the Americas region have been made consistent with the categories used by Analysts globally; and the effective time period for CCs has been reduced from a maximum of 180 days to 90 days.

United States: Approved and/or distributed by Deutsche Bank Securities Incorporated, a member of FINRA and SIPC. Analysts located outside of the United States are employed by non-US affiliates and are not registered/qualified as research analysts with FINRA.

European Economic Area (exc. United Kingdom): Approved and/or distributed by Deutsche Bank AG, a joint stock corporation with limited liability incorporated in the Federal Republic of Germany with its principal office in Frankfurt am Main. Deutsche Bank AG is authorized under German Banking Law and is subject to supervision by the European Central Bank and by BaFin, Germany's Federal Financial Supervisory Authority.

United Kingdom: Approved and/or distributed by Deutsche Bank AG acting through its London Branch at 21 Moorfields, London EC2Y 9DB. Deutsche Bank AG in the United Kingdom is authorised by the Prudential Regulation Authority and is subject to limited regulation by the Prudential Regulation Authority and Financial Conduct Authority. Details about the extent of our authorisation and regulation are available on request.

Hong Kong SAR: Distributed by Deutsche Bank AG, Hong Kong Branch, except for any research content relating to futures contracts within the meaning of the Hong Kong Securities and Futures Ordinance Cap. 571. Research reports on such futures contracts are not intended for access by persons who are located, incorporated, constituted or resident in Hong Kong. The author(s) of a research report, and the entities for which they act and/or are affiliated with, may not be licensed to carry on regulated activities in Hong Kong, and if not licensed, do not hold themselves out as being able to do so. The provisions set out above in the 'Additional Information' section shall apply to the fullest extent permissible by local laws and regulations, including without limitation the Code of Conduct for Persons Licensed or Registered with the Securities and Futures Commission. This report is intended for distribution only to 'professional investors' as defined in Part 1 of Schedule of the SFO. This document must not be acted or relied on by persons who are not professional investors. Any investment or investment activity to which this document relates is only available to professional investors and will be engaged only with professional investors.

India: Prepared by Deutsche Equities India Private Limited (DEIPL) having CIN: U65990MH2002PTC137431 and registered office at 14th Floor, The Capital, C-70, G Block, Bandra Kurla Complex, Mumbai (India) 400051. Tel: + 91 22 7180 4444. It is registered by the Securities and Exchange Board of India (SEBI) as a Stock broker bearing registration no.: INZ000252437; Merchant Banker bearing SEBI Registration no.: INM000010833 and Research Analyst bearing SEBI Registration no.: INH000001741. DEIPL's Compliance / Grievance officer is Ms. Rashmi Poddar (Tel: +91 22 7180 4929 email ID: complaints.deipl@db.com). Registration granted by SEBI and certification from NISM in no way guarantee performance of DEIPL or provide any assurance of returns to investors. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. DEIPL may have received administrative warnings from the SEBI for breaches of Indian regulations. Deutsche Bank and/or its affiliate(s) may have debt holdings or positions in the subject company. With regard to information on associates, please refer to the "Shareholdings" section in the Annual Report at: <https://www.db.com/ir/en/annual-reports.htm>. For latest India research audit report, refer https://country.db.com/india/deutsche-equities-india/index?language_id=1.

Japan: Approved and/or distributed by Deutsche Securities Inc.(DSI). Registration number - Registered as a financial instruments dealer by the Head of the Kanto Local Finance Bureau (Kinsho) No. 117. Member of associations: JSDA,

Type II Financial Instruments Firms Association and The Financial Futures Association of Japan. Commissions and risks involved in stock transactions - for stock transactions, we charge stock commissions and consumption tax by multiplying the transaction amount by the commission rate agreed with each customer. Stock transactions can lead to losses as a result of share price fluctuations and other factors. Transactions in foreign stocks can lead to additional losses stemming from foreign exchange fluctuations. We may also charge commissions and fees for certain categories of investment advice, products and services. Recommended investment strategies, products and services carry the risk of losses to principal and other losses as a result of changes in market and/or economic trends, and/or fluctuations in market value. Before deciding on the purchase of financial products and/or services, customers should carefully read the relevant disclosures, prospectuses and other documentation. 'Moody's', 'Standard Poor's', and 'Fitch' mentioned in this report are not registered credit rating agencies in Japan unless Japan or 'Nippon' is specifically designated in the name of the entity. Reports on Japanese listed companies not written by analysts of DSI are written by Deutsche Bank Group's analysts with the coverage companies specified by DSI. Some of the foreign securities stated on this report are not disclosed according to the Financial Instruments and Exchange Law of Japan. Target prices set by Deutsche Bank's equity analysts are based on a 12-month forecast period.

Korea: Distributed by Deutsche Securities Korea Co.

South Africa: Deutsche Bank AG Johannesburg is incorporated in the Federal Republic of Germany (Branch Register Number in South Africa: 1998/003298/10).

Singapore: This report is issued by Deutsche Bank AG, Singapore Branch (One Raffles Quay #18-00 South Tower Singapore 048583, 65 6423 8001), which may be contacted in respect of any matters arising from, or in connection with, this report. Where this report is issued or promulgated by Deutsche Bank in Singapore to a person who is not an accredited investor, expert investor or institutional investor (as defined in the applicable Singapore laws and regulations), they accept legal responsibility to such person for its contents.

Taiwan: Information on securities/investments that trade in Taiwan is for your reference only. Readers should independently evaluate investment risks and are solely responsible for their investment decisions. Deutsche Bank research may not be distributed to the Taiwan public media or quoted or used by the Taiwan public media without written consent. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation to trade in such securities/instruments.

Australia and New Zealand: This research is intended only for 'wholesale clients' within the meaning of the Australian Corporations Act and New Zealand Financial Advisors Act, respectively. Please refer to Australia-specific research disclosures and related information at https://www.dbresearch.com/PROD/RPS_EN-PROD/PROD000000000521304.xhtml. Where research refers to any particular financial product recipients of the research should consider any product disclosure statement, prospectus or other applicable disclosure document before making any decision about whether to acquire the product. In preparing this report, the primary analyst or an individual who assisted in the preparation of this report has likely been in contact with the company that is the subject of this research for confirmation/clarification of data, facts, statements, permission to use company-sourced material in the report, and/or site-visit attendance. Without prior approval from Research Management, analysts may not accept from current or potential Banking clients the costs of travel, accommodations, or other expenses incurred by analysts attending site visits, conferences, social events, and the like. Similarly, without prior approval from Research Management and Anti-Bribery and Corruption ("ABC") team, analysts may not accept perks or other items of value for their personal use from issuers they cover.

Additional information relative to securities, other financial products or issuers discussed in this report is available upon request. This report may not be reproduced, distributed or published without Deutsche Bank's prior written consent.

Backtested, hypothetical or simulated performance results have inherent limitations. Unlike an actual performance record based on trading actual client portfolios, simulated results are achieved by means of the retroactive application of a backtested model itself designed with the benefit of hindsight. Taking into account historical events the backtesting of performance also differs from actual account performance because an actual investment strategy may be adjusted any time, for any reason, including a response to material, economic or market factors. The backtested performance includes hypothetical results that do not reflect the reinvestment of dividends and other earnings or the deduction of advisory fees, brokerage or other commissions, and any other expenses that a client would have paid or actually paid. No representation is made that any trading strategy or account will or is likely to achieve profits or losses similar to those shown. Alternative modeling techniques or assumptions might produce significantly different results and prove to be more appropriate. Past hypothetical backtest results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis.

The method for computing individual E,S,G and composite ESG scores set forth herein is a novel method developed by the Research department within Deutsche Bank AG, computed using a systematic approach without human intervention. Different data providers, market sectors and geographies approach ESG analysis and incorporate the findings in a variety of ways. As such, the ESG scores referred to herein may differ from equivalent ratings developed and implemented by other ESG data providers in the market and may also differ from equivalent ratings developed and implemented by other divisions within the Deutsche Bank Group. Such ESG scores also differ from other ratings and rankings that have historically been applied in research reports published by Deutsche Bank AG. Further, such ESG scores do not represent a formal or official view of Deutsche Bank AG.

It should be noted that the decision to incorporate ESG factors into any investment strategy may inhibit the ability to participate in certain investment opportunities that otherwise would be consistent with your investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.
